Github: <https://github.com/abhishekyadav-01n>

Mobile: +91 9120674150

SKILLS

Languages: C++, Python, Java

Tools/Platforms: Docker, MySQL Server

Soft Skills: Problem-Solving, Team Player, Adaptability

PROJECTS

- AI Research Agent | *n8n, Ollama, LLM, Agentic AI* July' 26
 - Developed an AI Research Agent to automate topic-based research and generate structured research reports using n8n and Ollama.
 - Addressed the time-consuming and repetitive process of manually searching, collecting, organizing, and documenting information from multiple sources.
 - Built an end-to-end **agentic workflow** integrating an Ollama-based local LLM, HTTP tools, automated report generation, file conversion, and local storage using n8n.
- MeMora — Memory Management Visualizer| *Python, Streamlit, Plotly, Pandas* | [Live](#) April' 26
 - Simplified OS memory-management concepts by developing an interactive visualizer for Paging, Segmentation, Virtual Memory, and Page Replacement, covering 4 core memory-management modules.
 - Implemented 3 page-replacement algorithms (FIFO, LRU & OPT) to automate page-hit/fault calculations and dynamically track memory-frame states for user-defined reference strings.
 - Developed and deployed a Streamlit web app using Plotly and Pandas, featuring memory views, fault timelines, algorithm comparisons, and address translation.
- Loan Default Risk Prediction System | *Python, Scikit-learn, Streamlit, Explainable AI* | [Github](#) April' 26
 - Designed a machine learning system to predict the likelihood of loan default and support data-driven credit risk assessment.
 - Addressed the challenge of accurately identifying high-risk loan applicants, where missed defaults can result in significant financial losses.
 - Engineered an end-to-end ML pipeline using Logistic Regression, Decision Tree, Random Forest, and Gradient Boosting, with hyperparameter tuning, XAI-based explanations, and a Streamlit application for real-time predictions.

TRAINING

- Lovely Professional University Jun' 26 – Jul' 26
- Agentic Ai Automation using n8n
 - Built AI-powered agentic workflows using n8n, integrating LLMs, APIs, and external tools for automated task execution.
 - Designed multi-step automation pipelines with triggers, conditional logic, API integrations, and workflow.
 - Gained hands-on experience with Generative AI, LLM agents, prompt engineering, REST APIs, and AI workflow automation.

CERTIFICATES

- AI/ML | [Apna College](#) Aug' 26
- C Programming | [Coding Tantra](#) Jan' 25
- DSA | [Apna College](#) Dec' 24
- Interview Skill | [Coding Tantra](#) Oct' 24

EDUCATION

- Lovely Professional University Phagwara, Punjab
- Bachelor of Technology Aug' 24 – Present
- Jawahar Navodaya Vidyalaya Jaunpur, Uttar Pradesh
- Intermediate July' 22 – May' 23
- Jawahar Navodaya Vidyalaya Pratapgarh, Uttar Pradesh
- High School July' 20 – May' 21
